Division of Administrative Services
Office of Administration
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001
Ref: Yucca Mountain Review Plan (Nureg-1809, Revision 2)
Dear Mr. Lesar:

3/19/12
67FE15257

(31)

The current Yucca Mountain Plan omits consideration of key technical issues:

1. Those people near the transportation routes will be adversely affected by this radioactive waste.

2. If opened, Yucca Mountain will contaminate the groundwater of Amargosa Valley.

~~This draft omits a separate section that supply drinking water to the population of the Amargosa Valley.~~

The review plan referenced above does NOT address these issues. Please see reports from ~~the NRC and the DOE~~

regarding water supplies.

Humans make mistakes, but PLEASE
do not allow this big mistake to occur,
as the damage will be irreparable.

Sincerely,

Marilyn Sjaastad
